RE: Comments on McAnally Chicken Ranch CUP 3512

Dear Matt,

Below are our concerns as they relate to water quality of the San Jacinto Valley from said project. Thank you for considering our concerns, and please contact Autumn DeWoody at (951) 689-6842 or Autumn@iewaterkeeper.org with any questions.

1. How will the proposed development be designed to keep chicken excrement, petroleum products and other typical agricultural chemicals from being discharged into the river incidentally during dry weather, and wet weather conditions?
2. We trust that although the project is fast-tracked by the County, the development will be subject to all pertinent rules and regulations (e.g., Engineered Waste Management Plan, dust control, etc.) and not considered “exempt” in any way. If there are any exemptions, please notify our office.

Sincerely,

Garry Brown,
Executive Director
